📍 Vijayawada, Andhra Pradesh, 520010

📊 Skills

- C language
- Java
- DSA
- Oracle DBMS
- Basic SQL Queries

👤 Summary

Complex problem-solver with analytical and driven mindset. Dedicated to achieving demanding development objectives according to tight schedules while producing impeccable code.

Detail-oriented, organized, and meticulous employee. Works at fast pace to meet tight deadlines. Enthusiastic team player ready to contribute to company success.

Respectful self-motivator gifted at finding reliable solutions for software issues. Experienced in any tasks and offering Skill . Fluent in English and Basics of learning Spanish Language and accustomed to working with cross-cultural, global teams.

🎓 Education

Dhanekula Institute Of Engineering And Technology

Btech - Computer Science and Engineering, CGPA: 9.5

Vijayawada, Andhra Pradesh

May 2025

- Ranked 1 in Class
- Final Grade: 95%
- 9.5 GPA/CGPA
- Graduation with Distinction,[3 semester,2 year]
- Member of Machine Learning, 2 year to 4 year
- Internship name: AWS, Organization Name:Brainovision, Completed Year: 2 nd
- Cloud Computing Intern – Braniovision
- Developed and deployed a portfolio management application utilizing AWS EC2 instances, ensuring high availability and scalability.
- Implemented cloud-based solutions to enhance application performance and reliability.
- Collaborated with cross-functional teams to integrate AWS services, facilitating seamless cloud infrastructure operations.
- Gained hands-on experience in cloud computing, focusing on infrastructure deployment

Skills

- C language
- Java
- DSA
- Oracle DBMS
- Basic SQL Queries
- Basic Knowledge on AI and ML
- Full Stack
- Frontend
- Backend
- Communication Skills
- Cloud Computing
- AWS Administrator
- Problem Solving

Language

- English
- Hindi
- Spanish (Basics of learning)
- Telugu

Extra Curricular

Public Speaking & Event Hosting Experience

- Delivered impactful presentations on topics such as Environmental Conservation, Operating System Deadlocks, Pandemic Response Strategies, and the Role of Engineers, demonstrating strong research

• Cloud Computing Intern – Braniovision

- Developed and deployed a portfolio management application utilizing AWS EC2 instances, ensuring high availability and scalability.
- Implemented cloud-based solutions to enhance application performance and reliability.
- Collaborated with cross-functional teams to integrate AWS services, facilitating seamless cloud infrastructure operations.
- Gained hands-on experience in cloud computing, focusing on infrastructure deployment and management.
- Contributed to the optimization of cloud resources, aligning with best practices for cost-effective solutions.

Projects

- College project work on DT & I : Floating Solar Panel Innovation Project – 2nd Year Engineering

Conceptualized and developed a floating solar photovoltaic (PV) system designed to harness solar energy efficiently by utilizing water bodies, thereby conserving land resources.

Leveraged the natural cooling effect of water to enhance the efficiency of solar panels, addressing challenges related to land scarcity and water evaporation.

Conducted comprehensive research on floatovoltaic technologies, drawing insights from global implementations to inform design and functionality.

Designed modular and scalable floating structures to ensure adaptability across various aquatic environments, promoting sustainable energy solutions.

Aligned the project with India's renewable energy objectives, contributing to innovative approaches in sustainable energy generation

- Project Works:

1. Smart Agriculture Detection System

To address the challenges in modern farming, I developed a Smart Agriculture Detection System that leverages AI and computer vision technologies. This system is capable of identifying crop diseases and pest infestations in real-time, enabling timely interventions. By large agricultural fields efficiently, providing farmers with actionable insights to enhance crop yield and reduce losses. Such innovations are in line with recent advancements in AI-powered agriculture solution

2. RTC BUS: Recognizing the need for accessible and real-time public transportation information, I developed the Telangana RTC Bus Information Portal. This platform provides

- Pandemic Response Strategies, and the Role of Engineers, demonstrating strong research and communication skills.
- Served as an anchor and master of ceremonies for various college events, including the IBIC conference, annual fests, and cultural functions, showcasing leadership and audience engagement abilities.
- Collaborated with event organizers to plan and execute seamless programs, ensuring timely transitions and maintaining audience interest throughout events.
- Received positive feedback for clarity, confidence, and the ability to connect with diverse audiences, reflecting excellent interpersonal and public speaking skills.
- Demonstrated adaptability by tailoring communication styles to suit different event formats and audiences, enhancing the overall effectiveness of presentations and hosting duties.

powered signature solution.

2. RTC BUS: Recognizing the need for accessible and real-time public transportation information, I developed the Telangana RTC Bus Information Portal. This platform provides users with up-to-date schedules, bus routes, and live tracking of Telangana RTC buses. By user-friendly interfaces, the portal aims to enhance the commuting experience for daily passengers.

To facilitate seamless human-computer interactions, I designed an AI-powered chatbots that supports multiple modes of communication:

Voice-to-Voice : Enabling real-time spoken conversations with the AI. New York Post

Voice-to-Text : Transcribing spoken words into text for processing.

Text-to-Text : Allowing traditional text-based chat interactions.

Text-to-Voice : Converting written responses

This multi-modal approach ensures accessibility and convenience for users, catering to diverse preferences and needs. The integration of such features aligns with the capabilities of modern AI.

3. Sentiment Analyser: Understanding user emotions is crucial for enhancing interaction quality. I developed an AI-based Sentiment Analyzer that processes textual data to determine the underlying emotional tone—be it positive, negative, or neutral. This tool can be instrumental in various applications, from customer feedback analysis to social media monitoring, providing valuable insights into user sentiments.

4. Register and login: Ensuring secure access to applications is fundamental. I crafted intuitive and responsive Register and Login pages using HTML and CSS. These pages feature clean designs and user-friendly interfaces, facilitating smooth user onboarding and authentication processes. Incorporating best practices in web design, the forms are both aesthetically pleasing and functional, enhancing the overall user experience.

Certifications

Certification: Certifications & **Technical** Proficiency

- Earned certifications in core programming languages: Python , Java , C , and C++ , demonstrating strong foundational knowledge in software development.
- Completed courses in Data Structures and Algorithms (DSA) , Database Management Systems (DBMS) , and Web Development (HTML, CSS), enhancing problem-solving and full-stack development skills.
- Acquired expertise in Front-End Development , focusing on responsive design and user

maintaining audience interest throughout events.

- Received positive feedback for clarity, confidence, and the ability to connect with diverse audiences, reflecting excellent interpersonal and public speaking skills.
- Demonstrated adaptability by tailoring communication styles to suit different event formats and audiences, enhancing the overall effectiveness of presentations and hosting duties.

3.Sentiment Analyser: Understanding user emotions is crucial for enhancing interaction quality. I developed an AI-based Sentiment Analyzer that processes textual data to determine the underlying emotional tone—be it positive, negative, or neutral. This tool can be instrumental in various applications, from customer feedback analysis to social media monitoring, providing valuable insights into user sentiments.

4.Register and login:Ensuring secure access to applications is fundamental. I crafted intuitive and responsive Register and Login pages using HTML and CSS. These pages feature clean designs and user-friendly interfaces, facilitating smooth user onboarding and authentication processes. Incorporating best practices in web design, the forms are both aesthetically pleasing and functional, enhancing the overall user experience.
